**Subject:** SW gas and APS rate increases

**Date:** Sunday, February 09, 2020 12:12:41 PM

Docket # E-01345A-19-0236

---

Commissioner Burns,

I am contacting you in regard to the rate increases pending by SW Gas and APS utilities.

The SW gas rate increase is hardly needed at this time because of the low natural gas prices currently in effect.

Their rational that the average customer use of 24 therms would only result in an increase of \$7.01 per month is flawed.

My winter use averages 50 therms per month which would result in a \$14.00 a month increase. Colder weather would result

in even higher prices for the consumer.

In regards to APS, does this company ever stop in their requests for electric rate increases ?

Please help keep our utility rates low and not grant these excessive rate increases.

Regards,

Terrence Arnold
